

Press Release

Friday 22nd December 2006

Danelec Marine receives Wheelmark Approval for the DM500 VDR Voyage Data Recorder.

Danelec Marine has just received type-approval to the IMO resolution A.861(20) from the prestigious German notified body, BSH, for its new generation Voyage Data Recorder, the DM500.

“This is an important milestone and Danelec Marine has again demonstrated its ability to be in the forefront of the voyage data recorder technology” said Anders B. Rasmussen Managing director of Danelec Marine.

The DM500 is based on the architecture of the well proven DM300 Simplified Voyage Data Recorder, and is utilizing the same modular and flexible design.

“The DM500 offers an expandable platform whereby ship owners can add many unique optional features now and in the future” said Allan Lydersen Sales and Marketing Director of Danelec Marine and continue “we expect to see a high demand for this system in the new build market via our OEM partner and distributors”.
